FAST FLUX TEST FACILITY
Project Managers Meeting Minutes
825 Jadwin/Room 554/700 Area
Richland, Washington

December 19, 2013

- I. The approved June 27, 2013, Fast Flux Test Facility (FFTF) Project Managers Meeting (PMM) Minutes are in the Administrative Record. No PMMs were held July through November 2013.
- II. Status Report
 - A. Brett Barnes (CHPRC) stated that there was no change in status to report on the 400 Area Waste Management Unit (WMU). Rick Engelmann (CHPRC) noted that the 400 Area WMU is being maintained for future receipt of decommissioning waste. Mr. Barnes added that the dangerous waste report is being updated.
- III. Status of Previous Agreements and Commitments
 - A. There were no previous agreements or commitments to discuss.
- IV. New Agreements and Commitments
 - A. There were no new agreements or commitments.
- V. Near Term Schedules and Ongoing Activities (Milestones)
 - A. M-92-09

Lorna Dittmer (CHPRC) noted that milestone M-92-09 is associated with the sodium removal, and the milestone is under the major milestone M-92-00. Ms. Dittmer reported that Ecology and RL were provided a draft major change package to M-92-00, and the parties will need to have discussion about how to move forward with the change package. Ms. Dittmer stated that the current due date for M-92-00 is TBE by 1998, which is the old vernacular for TBD. A proposal was made in the change package to strike the parenthetical statement of TBE 1998 and change it to TBD.

Ms. Dittmer stated that there are three interim milestones remaining under M-92-00. The 300 Area special case waste interim milestone is due in 2015, and Washington Closure Hanford (WCH) is planning to have the remainder of the waste shipped out by February 2014, completing the interim milestone. The two remaining interim milestones are for disposition of the cesium strontium capsules, which CHPRC is developing a path forward for, and disposition of the sodium. Ms. Dittmer stated that to complete the two interim milestones, additional interim milestones will likely need to be established. Ms. Dittmer noted that Doug Chapin (RL) has suggested folding in additional information from the final tank closure Environmental Impact Statement (EIS) and the Record of Decision (ROD) for the EIS into the path forward for M-92-09.

Rick Bond (Ecology) stated that the interim milestones for the cesium strontium capsules, due in 2017, and the sodium, due in 2018, require a schedule to be developed. Mr. Bond noted that the draft change package states that when the two interim milestones are completed by 2018, a date for M-92-00 will be established. Mr. Bond acknowledged that John Price (Ecology) has requested an end date for M-92-00, and further discussions will be needed if Mr. Price continues to request an end date. Mr. Bond indicated that he will discuss the issue of establishing an end date for M-92-00 with Mr. Price.

Ms. Dittmer stated that since the proposed draft change package is associated with a major milestone, it would be a Class 1 change and require the signatories' approval. Ms. Dittmer noted that since it is a relatively minor change to remove a parenthetical statement, it may not have to go out for public comment. Ms. Dittmer added that the intent is to keep the discussions at a productive level in an effort to move forward with the sodium and cesium strontium disposition.

Mr. Bond referred to the draft change package, and suggested changing the wording from "may require establishing a final date for the final milestone" to "we will require."

- B. Mr. Bond noted that Ecology is requesting further justification for the current status. Joel Williams, Jr. (CHPRC) stated that a fair amount of justification was provided, in response to Ecology's inspection, for the long-term storage. Mr. Williams noted that the justification provided was the official Ecology response to the public for the long-term storage.

- C. Results of 400 Area Surveillance Last Spring

Mr. Engelmann stated that this topic was left over from the last FFTF PMM. Darin Corriell (CHPRC) stated that there has been no change as far as the facilities.

Mr. Corriell reported that direction was given from Energy Northwest to isolate the sewer system for the entire 400 Area by December 31, 2013, and a new sewer system is being installed. The new sewer system will be located near the old system, just northwest of the facility. Mr. Corriell stated that the old system has been isolated, and a temporary holding system is being used. It was noted that Energy NW stopped accepting the sewage due to low levels of tritium. Mr. Clark noted that the Department of Health (Spokane) has provided a great deal of oversight on the construction of the new sewer system. Mr. Corriell stated that the potable water system, which was managed by the liquids organization at ETF, is being transferred to the water purveyor at 100K. The potable water transfer utilizes an efficiency by having a single water purveyor.

- VI. Approved Changes Signed Off in Accordance with TPA Section 12.2

- A. There were no approved changes to discuss.

- VII. General Discussion

- A. Mr. Bond requested notification when the next FFTF inspection is conducted.

- VIII. Actions

- A. There were no actions identified.

- IX. Documents for the Administrative Record

- A. There were no documents identified for submittal to the AR.

- X. Next Project Managers Meeting

- A. The next PMM was scheduled for May 22, 2014.

FFTF PROJECT MEETING

825 Jadwin / Room 554

Hanford, Washington

December 19, 2013

8:15 – 9:00 A.M.

Agenda

- I. The approved June 27, 2013, Project Managers Meeting (PMM) Minutes were submitted to Administrative Record. No FFTF PMMs were held July through November 2013.
- II. Status Report
- III. Status of Previous Agreements and Commitments
- IV. New Agreements and Commitments
- V. Near Term Schedules and Ongoing Activities (Milestones)
 - A. M-92-09
 - B. "Path forward" on the response to the K. Conaway inspection report letter.
 - C. Brief on results of surveillance of 400 Area conducted this past spring by CHPRC.
 - D. 400 Area WMU Status.
- VI. Approved Changes Signed Off in Accordance with TPA Section 12.2
- VII. General Discussion
- VIII. Actions

Unit	Description of Action	Status	Date
- IX. Documents for Submittal to the Administrative Record
- X. Next Project Managers Meeting
